Freya Design Wooden Keepsake Boxes - What WE Say...

Just gorgeous. That's what we say about Freya Design wooden keepsake boxes. We were asked to look at the baby trinket gift boxes; three little boxes (in blue or pink flavours) for keeping baby's name bracelet, first curl and first tooth. These boxes are utterly delightful and very well made (tiny magnetic catches on the lid of each box).

If you are looking for a simply gorgeous gift to celebrate the arrival of a new baby then go, browse their beautiful boxes for babies section. Perhaps you are looking for a wonderful birthday present that's a bit different from the endless supply of toys many children seem to have these days? Have a good browse at their trinket, jewellery, keepsake and money boxes. I can't think of a child or parent who wouldn't be thrilled to receive one of these charming little wooden boxes, just gorgeous.

Freya Design Wooden Keepsake Boxes - What THEY Say...

Nordic simplicity and the vibrant colours blending in with the natural materials used is very much the trade mark of Freya Design. Wood, textile and other natural materials are used to achieve the unusual 3D designs that Freya Design is so famous for. The materials are carefully sourced from all around the world and the environment is always the main consideration when making decisions.

All products are painted with non-toxic paints and we have decided to leave the inside of the boxes unpainted in order to retain the natural smell of wood.

The ever expanding range includes many different sizes of keepsake boxes - anything from a small trinket box, jewellery box or
